03

Urban Living Room for Online Gamers

A participatory ecological landscape addressing social challenges faced by online gamers and pollution in Songhua Lake.

Grounded in ecological design, the proposal responds to the needs of online gamers through four strategies: energy release, energy recharge, smart interaction, and collective participation. Together, they create a positive cycle connecting gamers with other people, society, and nature.

PROJECT OVERVIEW

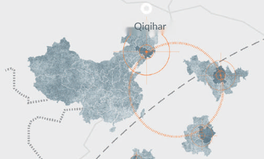

Jinchan Island Tourism Resort Master Plan
Songhua Lake, Jilin, China
Academic Design Project | November 2018

PROJECT METRICS

Site area: 34 ha | Green space ratio: 84.7%

Master Plan

Section A-A'

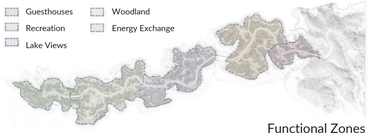

01 Eco-Parking
Dappled shadows, simple beauty
02 Woodland Cabins
Quiet time, a long journey
03 Local Cuisine Restaurant
Farmhouse smoke, a hearty feast
04 Sightseeing Boats
Waves at your feet, sails aloft
05 Gamer Index Assessment
Resting the mind, reflecting on time
06 Landscape Vista
A new chapter, a song in the landscape
07 Lookout Tower
Leaping fish, birds taking flight
08 Bicycle Relay Station
Energy in motion, adventure ahead
09 Wula Cultural Experience
Dancing light, a moment to pause
10 Wellness Garden
Wildflowers in bloom, fragrance in the air
11 Scenic Promenade
Islands in view, poetry in the clouds
12 Jet Skiing
Rippling water, playful echoes
13 Smart Fruit Picking
Spreading branches, colorful harvests
14 Wetland Viewing
Verdant reeds, cranes on the shore
15 Sunset Outlook
Evening clouds, moonlit ripples
16 Craft Workshop
Scattered roofs, drifting fragrance
17 Tactical Team Games
Arriving together, diving below
18 Campsite
Playful moments, shared laughter
19 Treehouses
Forest greens, a refreshing retreat
20 Floating Water Play
Fish in motion, people at play
21 "Daybreak" Interactive Installation
Playful poses, charming forms
22 Energy Exchange Station
Flickering lights, awaiting your return
