Green Network

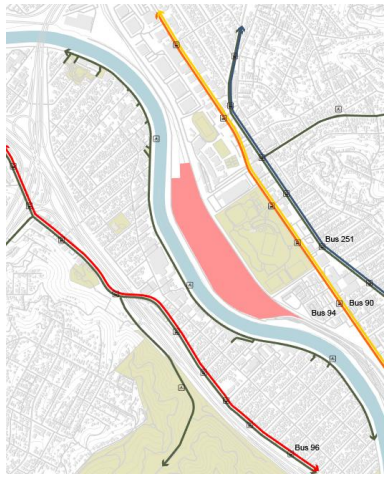

Riverfront Revitalization: Reimagining Taylor Yard G2
Los Angeles / California

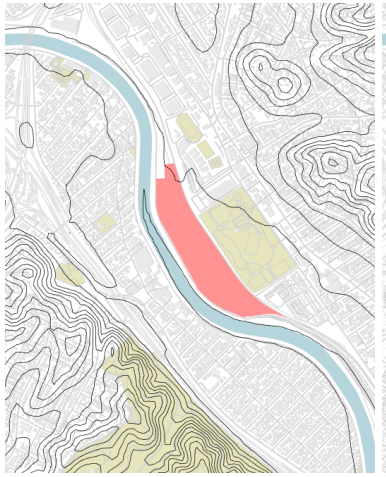

Instructor: Professor Deepak Bahl
2022 Capstone Class Project
Qing Hou

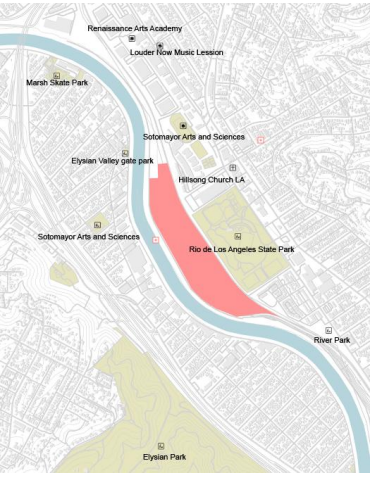

Context- isolation, lack of identification, insufficient facilitates

Park Name	Park acre	Tennis court	Basket ball court	Base ball field	Soccer field	Multi-purpose	Picnic Shelter	Playground	Community center	Restroom
Rio de LA SP	54.77	2	4	2	3	1	1	1	1	1
Elyria Canyan Park	35.90	0	0	0	0	0	0	0	0	1
Elysian Park	575.96	3	2	2	0	1	13	5	0	8
Marsh park	4.75	0	0	0	0	0	0	0	0	1
Rlysian valley Rec Center	2.00	0	1	1	1	0	0	1	0	0
Rlysian valley gateway	0.32	0	0	0	0	0	0	0	0	0

Context- pollution, flood risk, demand of park access

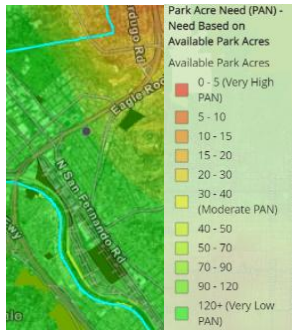

Park Access

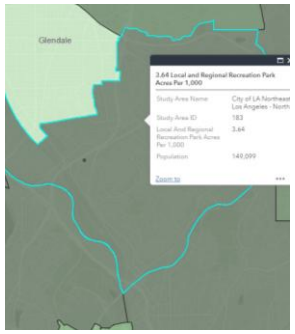

Park Need Framework	3
% Study Area Population Within Half-Mile of Park	50 %
Park Visitor Base, acres per thousand	0.48
Distance to Nearest Park	0.7 miles
Park Area Within 10 Minute Walk	119.65 acres

Environmental and Health

Pollution Burden Score	7
Diesel PM	30.12 kg/day
PM 2.5	12.41 ug/m3
Ozone	0.06 ppm
Asthma Rate	High
Diabetes Deaths, per 100,000	29
Combined Community Characteristics	Moderate

	Population	Education(less than high school)	Poverty(below twice the federal poverty level)	Unemployment
1	3,739	22%(+67%)	45%(+76%)	9%(+82%)
2	2,698	30%(+80%)	35%(+62%)	6%(+59%)
3	2,631	24%(+71%)	40%(+68%)	8%(+73%)
4	3,566	38%(+88%)	47%(+78%)	9%(+84%)
5	2,991	45%(+94%)	59%(+91%)	12%(+91%)
6	3,909	25%(+76%)	36%(+63%)	7%(+66%)
7	2,963	28%(+78%)	36%(+63%)	1%(+3%)
Total	22497	30%(+80%)	42%(+72%)	7.5%(70%)

Project vision – Green network

- ***Unite a physically fractured city and promote connection between individuals***
- *This site is salient for its barriers caused by a tangle of infrastructure, from rail lines t o LA river, which sperate it from the other side of the river and the nearby residential area. This project aims to utilize a multi-functional, inclusive and resilient approach to ties together currently isolated parks, neighborhoods, social and economic assets.*
- **Connective**
- **Integrative**
- **Identifiable**
- **Environmental responsible**

Site plan

Identifiable

Identifiable landscape
- Hills and meadow

Identifiable activities
- Climbing
- Regular festival
- Community garden

Identifiable architecture
- Earth-Sheltered Architecture
- Café and restaurant

Performance space

Connective

Promote Connection of Transportation

- Bridge to connect the Rio De Los Angeles Park
- Bridges to connect the two sides of LA river
- Connect the parcel with surrounding road network

Connect the landscape with the building

- Earth-Sheltered architecture: connect to green space

Connect the neighborhood

- Family activity space
- Space to host Cultural festival

Earth-Sheltered Architecture

Entrance

Integrative

Add insufficient Facility:

- Add retail like café and restaurant
- Add children and family activity space

Integrate the park system

- Integrate the surrounding parks with quick access to promote a more systematic service to serve more remote residents

Integrate the cycleway

- Add along river side cycleway

Children activity space

Children Activity Space

Environmental responsible

Promote green transportation

- Along river side cycleway to connect existing bikeway network.

Island

- Utilize island to discharge flood waters, green buffer

Material

- porous and permeable material to protect ecosystem

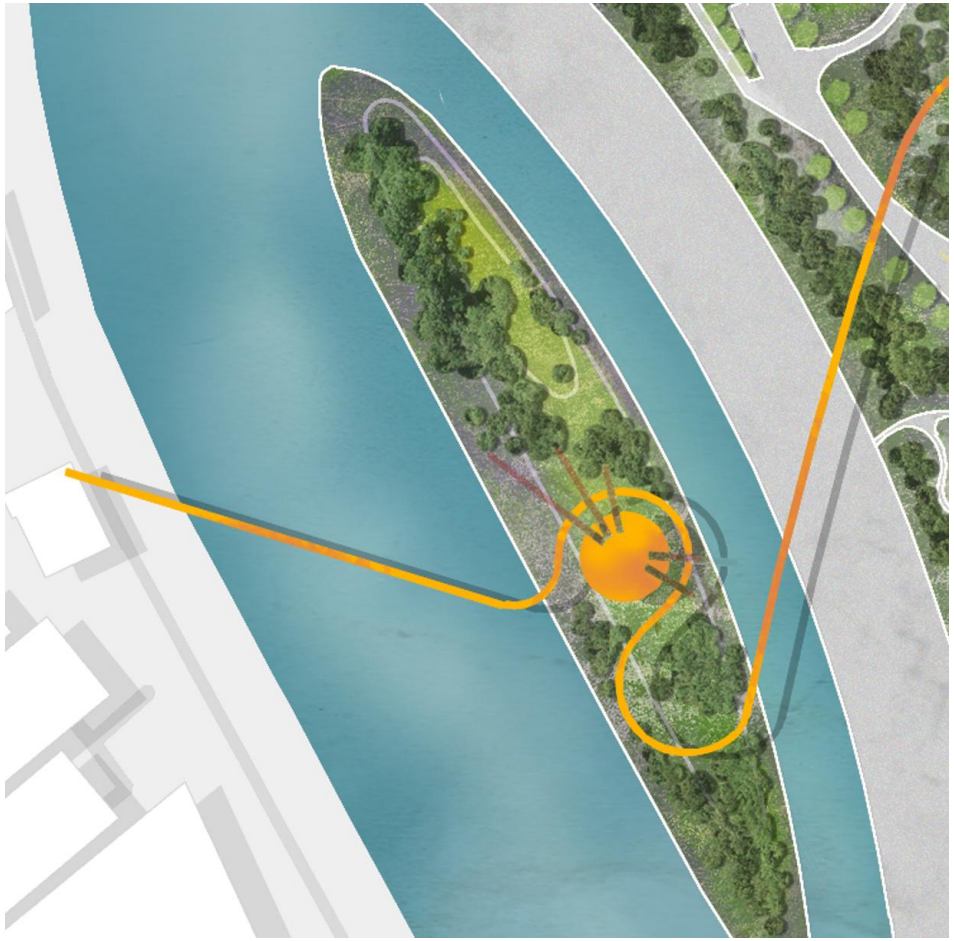

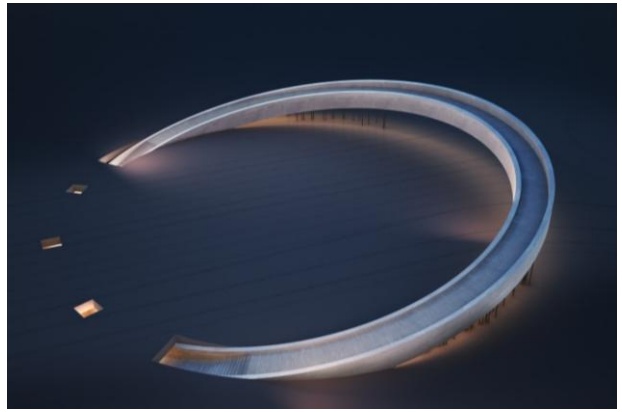

Water Bridge
